

## JANGO MEDIA MUSIC CENTRE

Jango media music centre is a cost effective way of storing and playing your music collection without having all the CDs and equipment cluttering up your room.

With the fully featured music server you can call up your favourite music in an instant – change between albums and even play random music from your entire collection – all without having to change CDs.

### Features and functions

- **High Capacity Storage**  
1000+ hours of music. Using a discrete unit hidden in a cupboard or out of sight you can have your complete music collection available at your fingertips.
- **Instant access and control**  
No more changing CDs and broken covers. Select the album from the list and instantly hear the music. Change the album in an instant play tracks from different albums or even random play throughout your whole collection
- **Build your own play lists**  
Play lists offer you the ability to choose the tracks of specific albums to listen to. Build lists of your favourite tracks and listen to music to suit the mood.
- **Wireless control**  
Control the music playing without cables wherever you are in the house. Using the handheld PDA software you can start, pause, stop music, change albums and control the volume all wirelessly. Full plays list selection, total music control: play, stop, FF, RW, skip, pause, random, volume control and custom menus.
- **Music in every room – without cables**  
Broadcast music to all rooms without installing cables.
- **Touch screen Display and control music**  
A touch screen option provides visual information and control of your music. See the album cover and additional information about the artist and group. Full plays list selection, total music control: play, stop, FF, RW, skip, pause, random, volume control and custom menus.
- **Easy loading of your CD collection**  
Simply insert the CD once and all the music and information will be automatically loaded into the server.
