

JANGO MEDIA REMOTE CONTROL

MDA-MUSE-066

The Jango media centre is a cost effective way of storing and playing your music collection without having all the CDs and equipment cluttering up your room.

With the fully featured remote control you can operate the media centre from a PDA or computer wirelessly. Pick your favourite albums, skip a track, and turn up the volume – as if you were next to your stereo – and all without having to change CDs.

Features and functions

- **Wireless Remote Control**
The remote control option allows wireless operation of the media centre without the need to be near the centre or even pointing at the centre. By using modern wireless communications you can have the centre out of sight and still choose and play your favourite music.
- **Favourite Album**
By simply selecting from a list you can choose your favourite artist or album.
- **Build your own play lists**
Play lists offer you the ability to choose the tracks of specific albums to listen to. Build lists of your favourite tracks and listen to music to suit the mood.
- **Fully Featured control**
Control the music playing without cables wherever you are in the house. Using the handheld PDA software you can start, pause, stop music, change albums and control the volume all wirelessly. Full plays list selection, total music control: play, stop, FF, RW, skip, pause, random, volume control and custom menus.
- **PDA or Computer**
The remote control is software designed to run on your PDA or computer and provides visual information and control of your music.
- **Multi-zone control**
By operating a central music centre you can share the albums and play different music in different locations. The Kitchen, the dining room, the bedrooms and the office – all controlled from your PDAs.
